Arizona Water Policy ENVS 596B
cross-listed as HWRS, LAW, PLG and GEOG 596B

Spring Semester 2015
Fridays 9:00 to 11:30
Water Resources Research Center
Sol Resnick Conference Room
350 N. Campbell Avenue

This course focuses on current Arizona water policy from a multi-disciplinary perspective. Through readings, research, lectures, discussions and presentations, the student is exposed to major, current water resource issues facing Arizona and other parts of the West – and world – and policies to address them. The faculty and lecturers draw upon their experiences to demonstrate the development, analysis and implementation of real-world water policy. The all-day field trip, scheduled for March 31, 2015 is not to be missed!

Please contact Professor Sharon B. Megdal, Director, Water Resources Research Center and Professor, Department of Soil, Water and Environmental Science with questions.
